

FRISCH'S
BIG BOY®

"In assessing our internal maintenance department of 45 years. I quickly realized that we had inefficiencies that needed to be fixed. In researching consultants, we found North Scioto Enterprises and John Getha. John's background and accomplishments make him the expert Frisch's was looking for to assess and make recommendations for our facility maintenance program. With John's knowledge of Computerized Maintenance Management Systems (CMMS), he led our integration team, mapping and testing the integration of our CMMS into our accounting software and created our standard operating procedure documents for using our CMMS. He is an excellent communicator to all stake holders and his commitment to our success differentiates him from his competition."

Bob Ritter, Executive Vice President of Operations
